Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 February 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 12, 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The expression "the notch" (claim 12) has no definite antecedent basis in the claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-4, 6, 8, 9, 10-27,29, 31-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ginnow in view of Rogers. The patent to Ginnow teaches structure

Art Unit: 3637

substantially as claimed including top deck, (21, 23), bottom decking, stringers (22), notches (24), end caps (20) the only difference being that the structural members do not include side wall, top wall, bottom wall and beam type structure. However, the patent to Rogers teaches the use of providing such structural members used in structural members of a pallet to be old. It would have been obvious at the time of the invention to modify the structure of Ginnow to include a structural members as taught by Rogers since such structures are conventional structures used in the same intended purpose of providing members for a loading structure, thereby providing structure as claimed.

Claims 5, 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ginnow in view of Rogers as applied to the claims above, and further in view of Colas. The patent to Ginnow in view of Rogers teaches structure substantially as claimed as discussed above including extension structure for the structural members, the only difference being that the extension is not folded back to provide a locating structure for the deck members. However, the patent to Colas(fig. 2) teaches the use of providing a folded back section to provide for a connecting assist to be old. It would have been obvious and well within the level of ordinary skill in the art at the time of the invention was made to modify the structure of Ginnow in view of Rogers to include a folded back member of the extension, as taught by Colas since such structures are conventional structures used in the same intended purpose thereby providing structure as claimed.

Allowable Subject Matter

Claims 7, 30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Schleicher et al, Pitchford, Zetterberg, Woods et al, Hamkins et al, Weiss, Schleicher '960, Depew, Rogers teach structure similar to applicant's.
